Projects

Taskline | *Next.js, TypeScript, Socket.IO, NextAuth.js, SQLite (WASM)*
– Built a full-stack real-time task management application with authentication, live updates via Socket.IO, and comprehensive end-to-end test coverage.
– Delivered as an internship project; designed the schema, API routes, and UI from scratch as a solo developer.

College Management System | *Next.js, Node.js, PostgreSQL, TypeScript, Prisma*
– Developed a role-based access control system for students, faculty, and admins with real-time attendance tracking.
– Implemented SMS OTP authentication via Fast2SMS and a normalized PostgreSQL schema managed through Prisma ORM.

Ledger | *React, Kotlin (Android), MVVM, Room, MPAndroidChart*
– Built a personal budget tracker with monthly spending breakdowns, CSV export, and configurable spending limits.
– Shipped both a React web version and a native Android version using MVVM architecture and Room persistence.

Developer Portfolio | *Next.js 14, Tailwind CSS, Framer Motion*
– Designed and built a personal portfolio from scratch, deployed at bikashdash.vercel.app, featuring a dark, custom-themed UI with light/dark mode persistence.
